

Florence Nightingale Day 2024 in Atlantic Canada

May 24 | 9:30 am–1:30 pm

We had thirty students in attendance and 5 'staff' (Dr. Connie Stewart - Professor and Chair of the UNBSJ Mathematics and Statistics Department, me - Regional Director of CANSSI Atlantic and Professor in Dal's Mathematics and Statistics Department, Dr. Maggie Brown - Assistant Professor in the UNBSJ Mathematics and Statistics Department, and three others [...]). We provided some history about Florence Nightingale, performed two activities (one about samples and populations and statistics thereof and the second demonstrating the mark-recapture method as a way of estimating population size), went on a tour of the UNB SJ campus, had a pizza and cookie lunch and a panel discussion about careers in statistics and pathways to success.
